

## VICTOR SHAFT WORK PROVES SATISFACTORY

Has Attained Depth of Two  
Thousand Feet and Sink-  
ing to Continue

MINE IS HUM OF ACTIVITY

Great Ore Bodies are Exposed  
On Various Levels and Pro-  
duction Follows

Million week rolled around with the Tonopah Mining company, and a shipment of 25 bars was made yesterday weighing 67,125 ounces and having an estimated value of \$75,000. This was a slight increase over the preceding shipment made on the first half of July. The latest shipment was the result of the clearing of the mill for the last half of July.

The Victor shaft has reached a depth of 2000 feet, and the sinking of has been installed and work is to be continued both in construction and sinking the ultimate depth for the present to be 2125 feet.

Development for the month of July resulted in 719 feet of underground work being performed at the Victor shaft classified as follows: Drift, 348 feet; raising, 271 feet; crosscutting, 100 feet.

Official report of operations for the past week follows:

Victor Shaft Development.

1500 level—1718 crosscut has reached the point under the Cash Boy shaft where a raise will be started to connect for ventilating purposes.

1500 intermediate level—Drift 3 was advanced 27 feet in breccia on milline ore. Drift 5 east, work resumed following two feet of good

ore. Three raises Nos. 2, 3 and 4 started to connect with 1760 level. 1880 level—Three west drifts, 1803, 1809 and 1810, advanced on good ore above the average milling grade. 1809 east drift and 1808 west drift, started to make a new haulage way from the Murray vein. Six raises being driven to the 1804 intermediate level for ventilation and for blocking out ore preparatory to stopping.

Stopping Operations. 1480 level—Stope 1647 on the Murray vein is producing the principal tonnage from this level. Stope 1605 on the hanging wall of the Murray vein, shows three feet of good grade ore.

1760 level—Stope 1763 west and stope 1702 east, in good milling ore.

1801 intermediate level—Stope 5, east, on four feet of milling ore. Stope 2, east, and stope 1, west, producing better than average grade ore.

1880 level—Stopping on this level on Murray vein in what is known as Nos. 1803 east and 1801 west. Anchor vein stopes, 1802 east and west and 1801 laying ails on 1803 west preparatory to square setting.

Sinking Operations. The Victor shaft has reached the 2000 level where the station set in. Work will be continued both by crosscutting and sinking the shaft to the 2125 level.

McKane Shaft. All development work has been suspended until the pumping equipment has been installed on the 1540 level. This work is being rushed two shifts of men being employed in installation and one shift being engaged in lowering pumping machinery etc.

## NEW MINERAL FIND IS MADE MIZPAH VEIN

Big Cave that Occurred Last  
Sunday Night Disclosed a  
Rich Vein of Ore

OPERATION NOT INTERRUPTED

Bullion Shipment Will Be Made  
Within Next Day or Two  
From Desert Mill

No official report of development was heard this week by the Tonopah Mining company, but operations progressed at a highly satisfactory rate. The only development of interest that took place was the big cave that occurred on Sunday night when the ground dropped to the level of some old stope workings, particular mention of which will be found on page three of this issue of the Tonopah Mining Reporter.

There was no suspension of work as a result of this cave as such had been anticipated for a long period. While the material from the stope was being drawn it was taken from a passage and there had never at any time been any danger in the drawing of the miners that were being employed.

As a result of this cave a new vein of ore was exposed, that had been overlooked and which probably

never would have been found owing to the ground being in such a threatening and dangerous condition. However, it will now be possible to proceed with the mining of this rich mineral deposit and there is more than an even chance that a heavy earning will follow in due course of events.

While the bullion shipment was expected to be sent out today a delay occurred in retorting and the

same will not be billed out before Sunday or Monday morning. It is expected, however, that the usual values of between \$55,000 and \$60,000 will result. While the cave on the Mizpah ground resulted in the destruction of the assay office and oil house, the loss did not exceed \$12,000. New buildings are to be erected immediately on territory that is known to be absolutely safe.
